

Co-design: unlocking the potential for better policy and delivery

Alastair Child
Director Auckland Co-design Lab
The Southern Initiative

www.aucklandco-lab.nz
@CodesignLab_AKL

About the Lab

Set up in late 2014

Public sector innovation team - focused on co-design

Sponsored by 8 government agencies and Auckland Council

Works collaboratively with others

connecting to community & place

- Drawing on local knowledge and strengths
- Building credibility and connections
- Establishing local needs

curiosity, optimism, creativity

- Being radically open minded
- Looking at problems from different angles
- Working with polarities and tensions

making it happen

- Finding ways through when under pressure
- Providing support
- Behaviour change
- Coordinating action
- Implementation

outcomes-se

- Looking for the biggest opportunities
- Pragmatic and strategic
- Identifying energy and opportunity for
- Responsive to changing landscape (not precious)

What we do

**Challenges and
projects**

**Building
capability**

**Sharing
learning**

Southern Initiative

Place based team - South
Auckland

Community and social
innovation

Focus on 'cradle to career'

- Strengths based
- Whānau / family centric
- System level change

What we'll cover this morning

Context and
about
co-design

A thought bubble with a thick black outline, containing the text 'Context and about co-design'. It has two small circles at the bottom left, suggesting it is connected to the main title.

Early years
challenge
case study

A thought bubble with a thick black outline, containing the text 'Early years challenge case study'. It has two small circles at the bottom left, suggesting it is connected to the main title.

What might
this mean for
policy and
delivery

A thought bubble with a thick black outline, containing the text 'What might this mean for policy and delivery'. It has two small circles at the bottom left, suggesting it is connected to the main title.

1

Why the interest in co-design and what does it offer?

Challenge

“...past efforts to solve complex policy problems have been too fragmented and not built on an understanding of the complex social systems they must work in..”¹

Response

“...leaving governments with little choice ‘but to innovate’ through more ‘experimental approaches that requires new capabilities and skills”²

Opportunity

“.....stakeholders consistently identified the need for better consultation, quality engagement and co-design of solutions to complex problems to deliver better outcomes..”³

“An appropriate definition of co-design as a methodology for policy making would recognise it as a design-led process, involving creative and participatory principles and tools to engage different kinds of people and knowledge in public problem solving.”

The Promise of Co-Design for Public Policy, Emma Blomkamp (2018)

Some key principles

**Human lens,
Systems view**

Visual & Tangible

**Iterative, Emergent
& Developmental**

**Collaborative &
Participatory**

**Strengths-based,
Capacity building**

Sharing power

What kinds of benefits from co-design?

More creative

Better focus on users

**Better cooperation
across disciplines**

Better outcomes

Better relationships

Improved capabilities

Engaging as experts

Better service fit

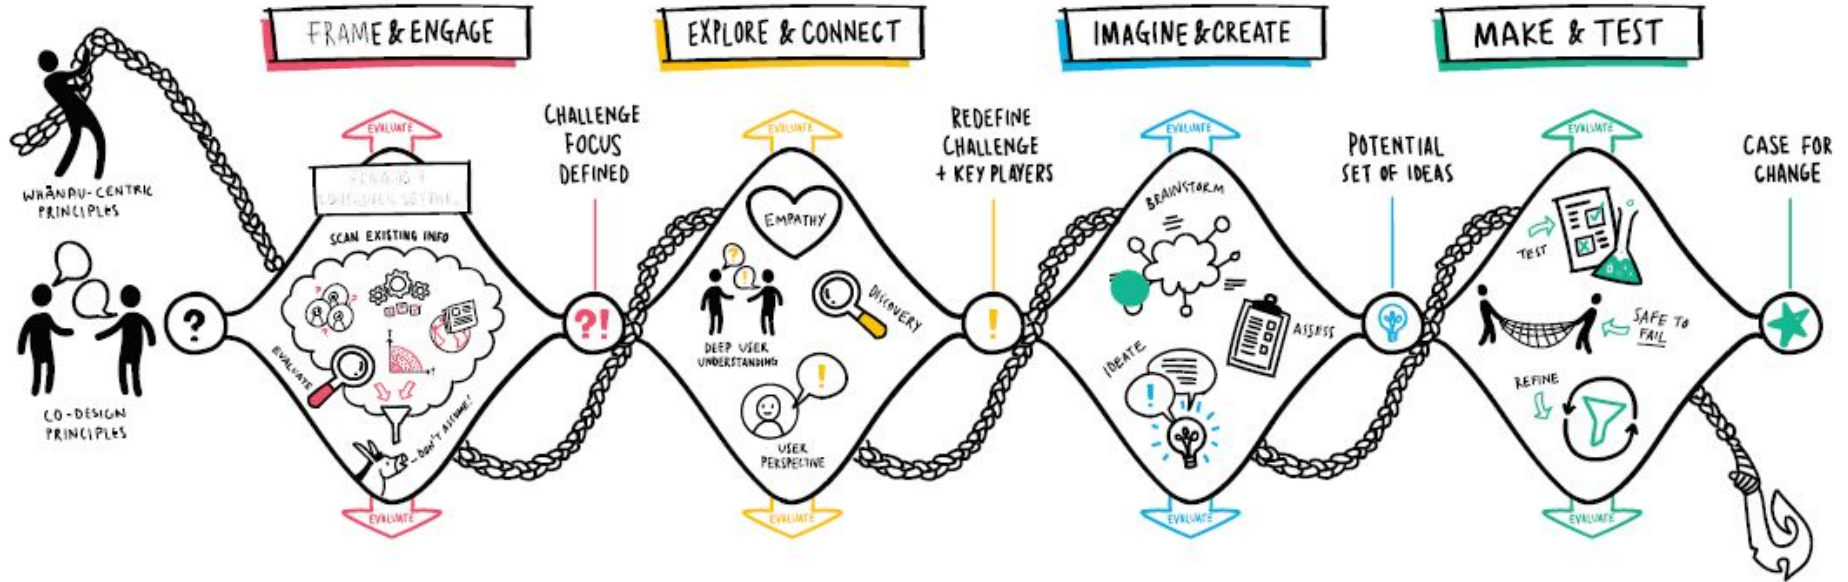

Better outcomes

Localised services

**New capability &
capacity**

Improved connections

A process to guide us

The practice of whānau-centric co-design

The practice is constantly evolving in response to the team's learning and changing environmental factors. The whānau-centred work and the co-design process interact constantly and have their own underlying principles and rhythms.

An interesting insight is that co-design corresponds naturally with culturally-rooted practices that create mutual trust and learning and shared power and momentum.

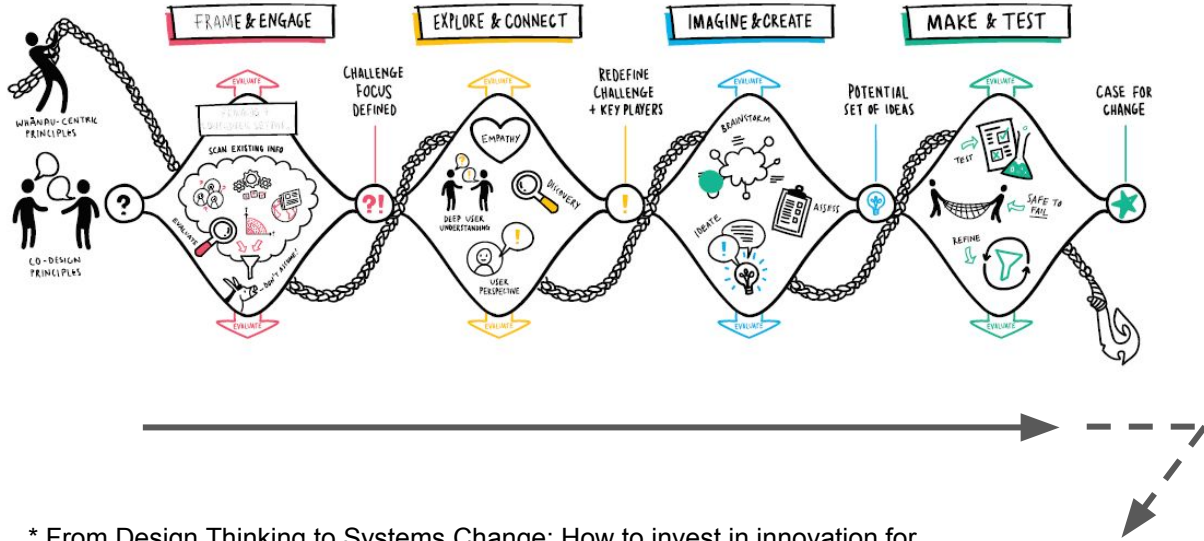

<p>Whānau centric principles</p> 	<p>Manaakitanga Hosting whānau in a way that empowers them, and removes any barriers to participation.</p>	<p>Whanaungatanga Establishing meaningful relationships in culturally appropriate ways. Engaging whānau in a way which builds trust.</p>	<p>Tino Rangatiratanga Whānau have the autonomy to decide how and when they will participate. Co-decide as well as co-design.</p>	<p>Mana Whānau are the experts in their lives. Ensuring a balance of power.</p>	<p>Ako Mutually reinforcing learning.</p>
<p>Co-design principles</p> 	<p>Human-centred space</p> <ul style="list-style-type: none">  Create a neutral, creative, empowering space  Be user/whānau-centred rather than system-centred  Embrace ambiguity: we don't know the question let alone the answer 	<p>Humble, curious, empathic mind set</p> <ul style="list-style-type: none">  Beginner's mindset: humility not expertise, suspend judgment  Empathy: immerse, observe engage, ask why  Seek to understand drivers and emotions beneath the surface 	<p>Radical collaboration</p> <ul style="list-style-type: none">  Seek and harness a diverse range of skills and experiences  Partnership: Design 'with' not 'for'  Start with lived experience  Redefine the question to reflect diverse perspectives, then work together to generate multiple ideas 	<p>Iterative learning</p> <ul style="list-style-type: none">  Build capability in partners as well as learning from them  Bias towards action; learn by doing  Use the power of duos and groups  Build to think - harness kinaesthetic skills  Iterate and test in multiple rounds of empathy using tangible prototypes 	
<p>In practice</p> 	<p>Creating the space</p> <ul style="list-style-type: none"> • Create safe spaces - physical, emotional, spiritual, cultural • Provide respite from toxic stress <i>i.e. a calm space away from worries with all immediate needs catered for</i> • Reduce whānau-defined barriers to participation <i>e.g. enabling tamariki to attend, within school hours</i> • Avoid trauma triggers <i>e.g. institutional settings and symbols</i> 	<p>Relationship and nurture</p> <ul style="list-style-type: none"> • Invite people in a way that shows that they are valued • Never judge • Practice deep empathy <i>i.e. listening, accepting</i> • Show respect • Establish genuine, consistent and caring connections <i>e.g. same people each time, real relationships</i> 	<p>Flipping assumptions and sharing power</p> <p>Demonstrate that whānau are:</p> <ul style="list-style-type: none"> • An asset not a problem • Partners not subjects or recipients • Co-deciders and co-producers not just co-designers • The experts in their own lives not the beneficiaries of experts' knowledge/advice • As professionals cede power and act as conduits, partners, container builders, coaches, learners. 	<p>Intentional skill building</p> <ul style="list-style-type: none"> • Deploy skillful coaching and deliberate confidence and skill building • Provide 'biodegradable' support that fosters independence not dependence • Allow people to be reflective and to build self-awareness • Provide the conditions and container for peer-to-peer learning • Create opportunities for learning through doing 	

ETRO-CANAVE

MIND THE GAP

The system immune response*

- COMPETING INCENTIVES
- REGULATORY FRAMEWORKS
- PROCUREMENT
- MARKET READINESS
- MEDIA BACKLASH
- CULTURAL NORMS

* From Design Thinking to Systems Change: How to invest in innovation for social impact by Rowan Conway, Jeff Masters and Jake Thorold, July 2017

Summary

**Co-design can
provide a system
view with a human
focus**

**Principles and
mindsets more
important than
process and tools**

**Building capability
and nurturing
conditions for
innovation**

2

Case study

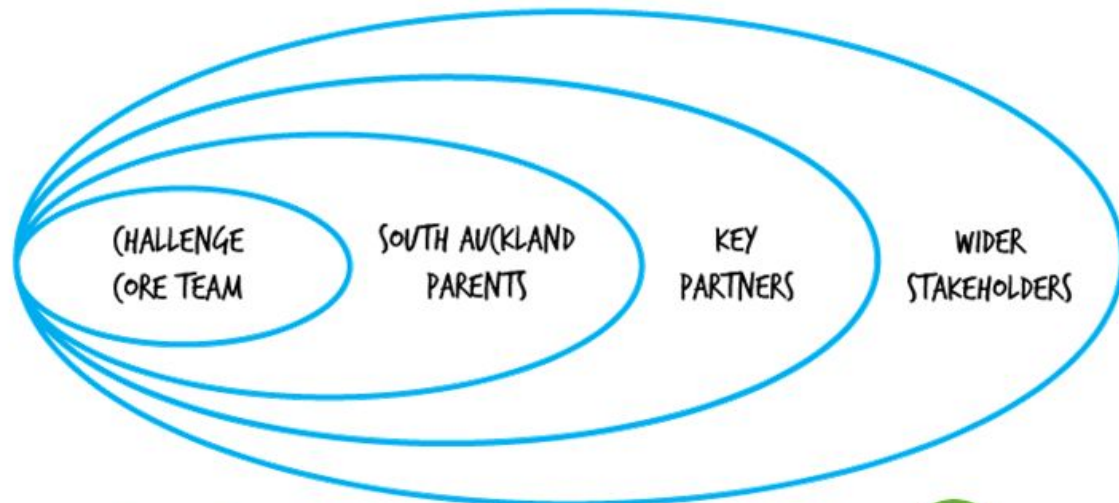

“Some have compared a child’s evolving health status in the early years to the launching of a rocket, as small disruptions that occur shortly after take-off can have very large effects on its ultimate trajectory.”

Center on the Developing Child
Harvard University, 2010

Who was involved?

Parents and families

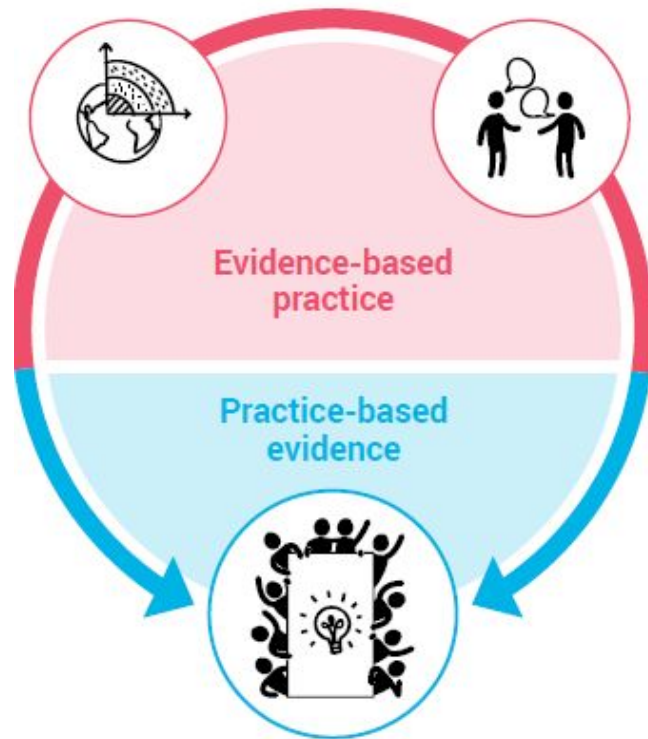

Ohomairangi Trust
"Ehara taku toa i te toa takitahi engari, he toa takitini"

Center on the Developing Child

Big data, Quantitative
Focus on 'what', 'where' and 'who' is experiencing various indicators of disadvantage

Thick data, Qualitative
Focus on 'why' and 'how' people experience disadvantage, and what can help to shift indicators

Testing, prototyping, learning what works

Working with communities in context to create action and foundations for shifting outcomes.

New insights from parents

(CREATING 'HOME')

Becoming a parent brings about many changes including how people live in their homes. Some families have less control over this if they are renting, sharing a home with a disruptive partner, living in poor or overcrowded conditions or are frequently moving house. This lack of autonomy can negatively impact on the family's ability to parent. In order to cope, parents show resourcefulness by changing how they use the space they do have, developing new routines and structures, or **creating 'home'** in safe places outside the house such as libraries, parks, churches etc.

Ripples of impact

Enhancing bandwidth

- Creating new skills and rediscovering old ones
- Reducing stress factors
- Self awareness
- Having confidence in myself

Confident whānau

- Confident in my home
- Communication
- Story telling
- Creating routines
- Calming the chaos
- Modelling
- Intentionally testing new approaches

Connecting with peers

- Belonging
- Finding like-minded people
- Confident with my peers
- Creating new networks
- Easy to ask for help
- Mutual learning
- Support

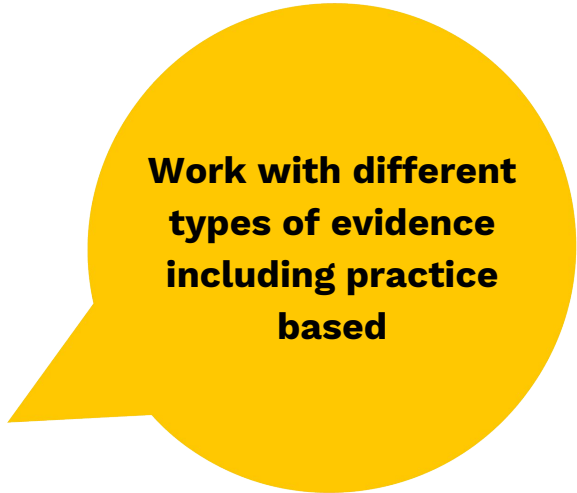

Community sense of purpose

- Success and change
- Confident in my community
- Contribution
- Sense of purpose
- Able to ask for help
- Inspiring and being inspired
- Reciprocity
- Participation bias

Summary

**Privilege the lived
experience of the
people closed to the
issues**

**Work with different
types of evidence
including practice
based**

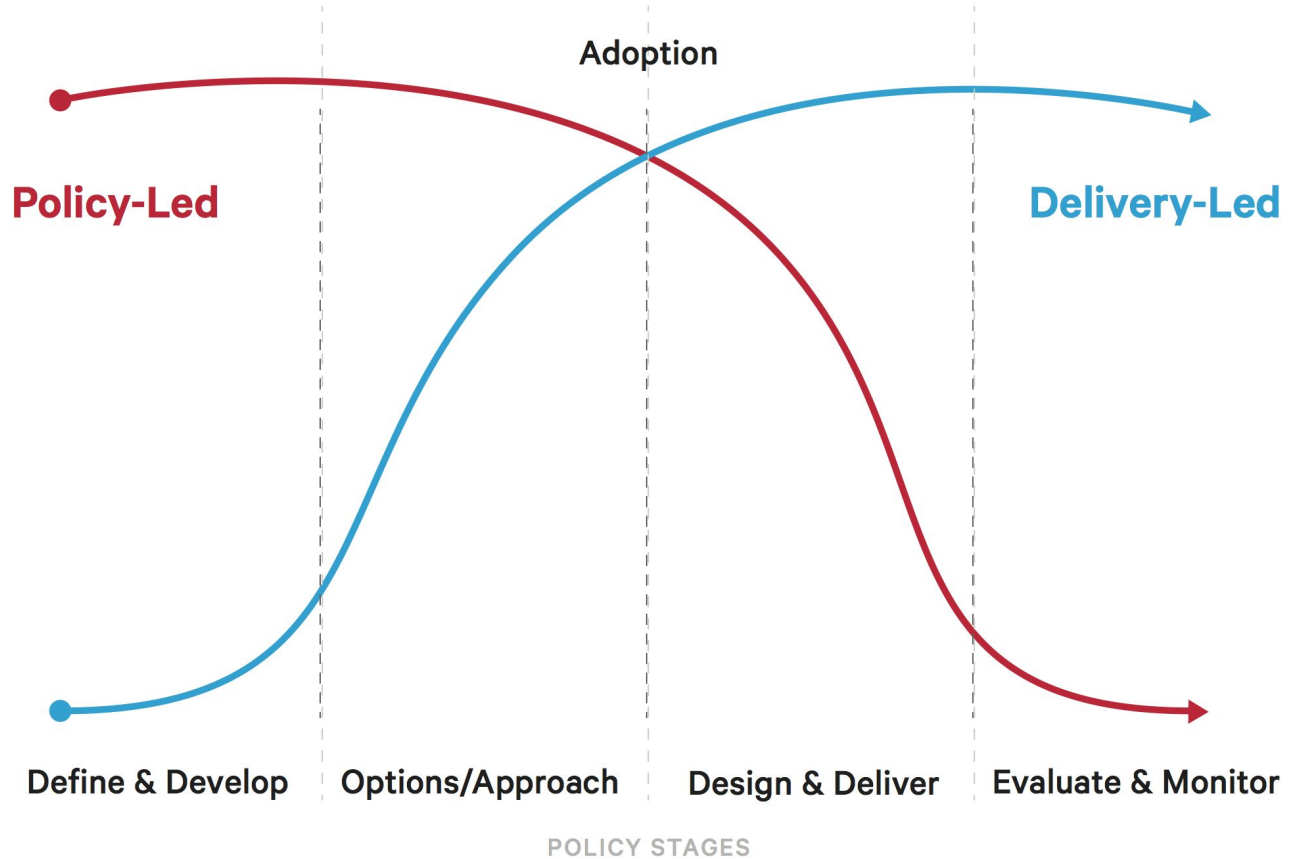

**Value culture and
use co-design to
grow new skills and
capabilities**

3

Policy, delivery and co-design

The landscape

The landscape

The landscape

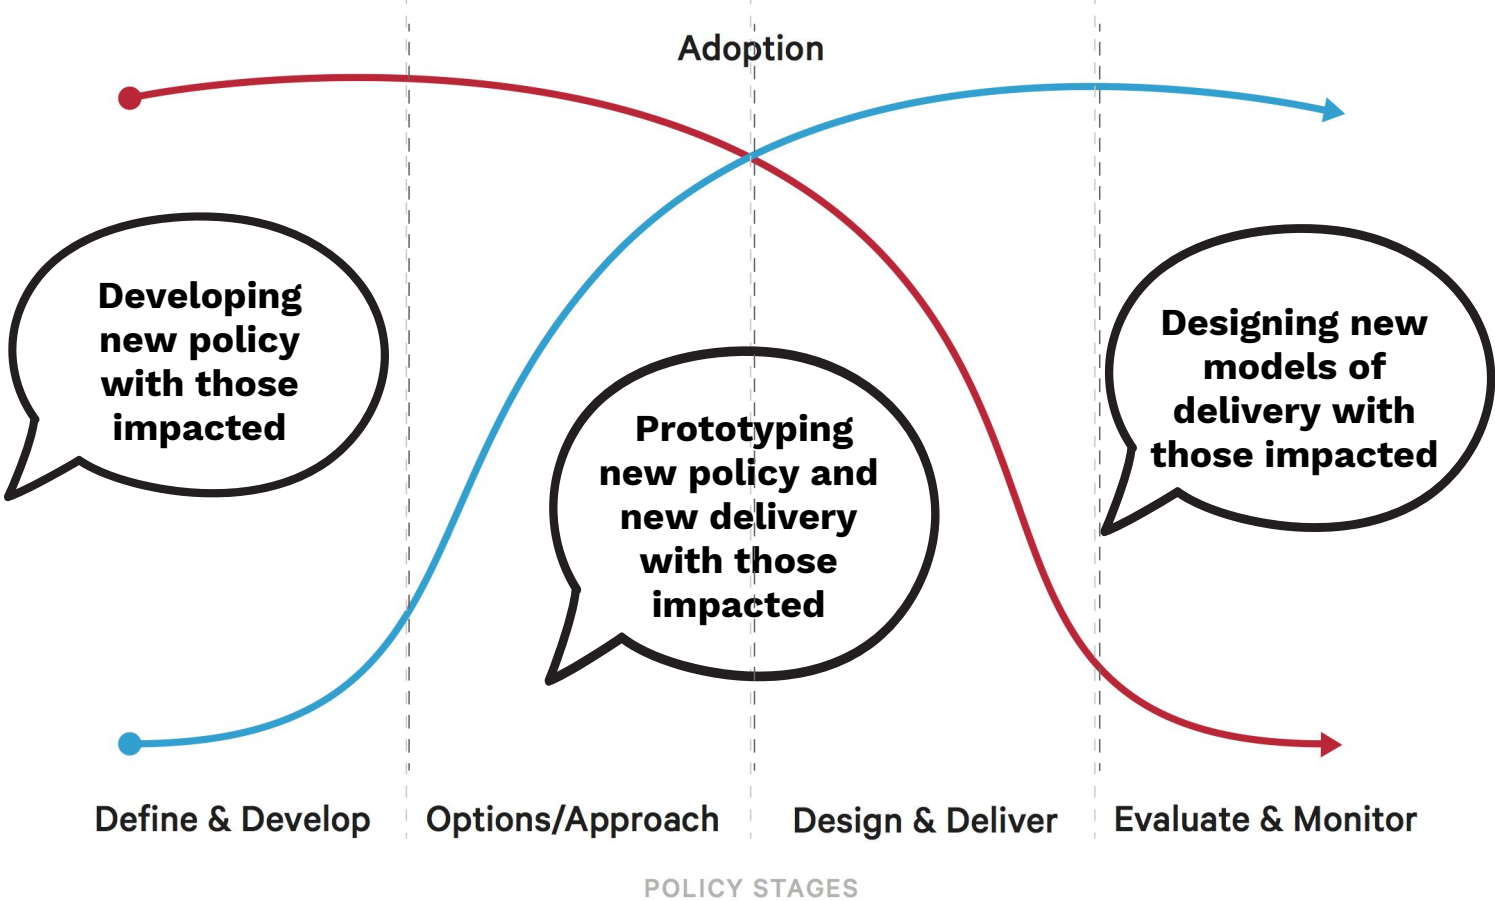

POLICY STAGES

The Opportunity

The Opportunity

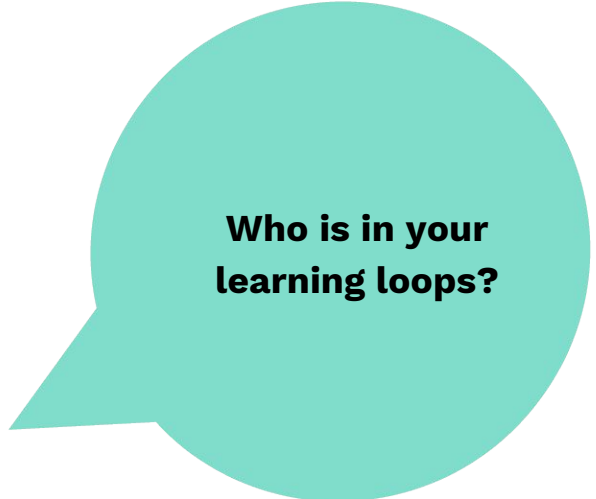

Summary

**New mindsets,
capabilities and
conditions**

**Co-design has role
across policy
development,
implementation and
delivery**

**Who is in your
learning loops?**

Conclusion

transdisciplinary

Creating new knowledge through shared learning and multiple perspectives

manaakitanga

Hosting in a way that empowers
Removing barriers to participation
Avoiding trauma triggers
Providing respite from toxic stress

curiosity, optimism, creativity

Being radically open minded
Looking at problems from different angles
Working with polarities and tensions

making it happen

Finding ways through when under pressure
Providing support
Behaviour change
Coordinating action
Implementation

storytelling

Using visuals and stories to convey meaning and compel action
Bringing others along on the journey

developing insights with people

Contextual research
Interviews
Observations
Relationships

connecting to community & place

Drawing on local knowledge and strengths
Building credibility and connections
Establishing local needs

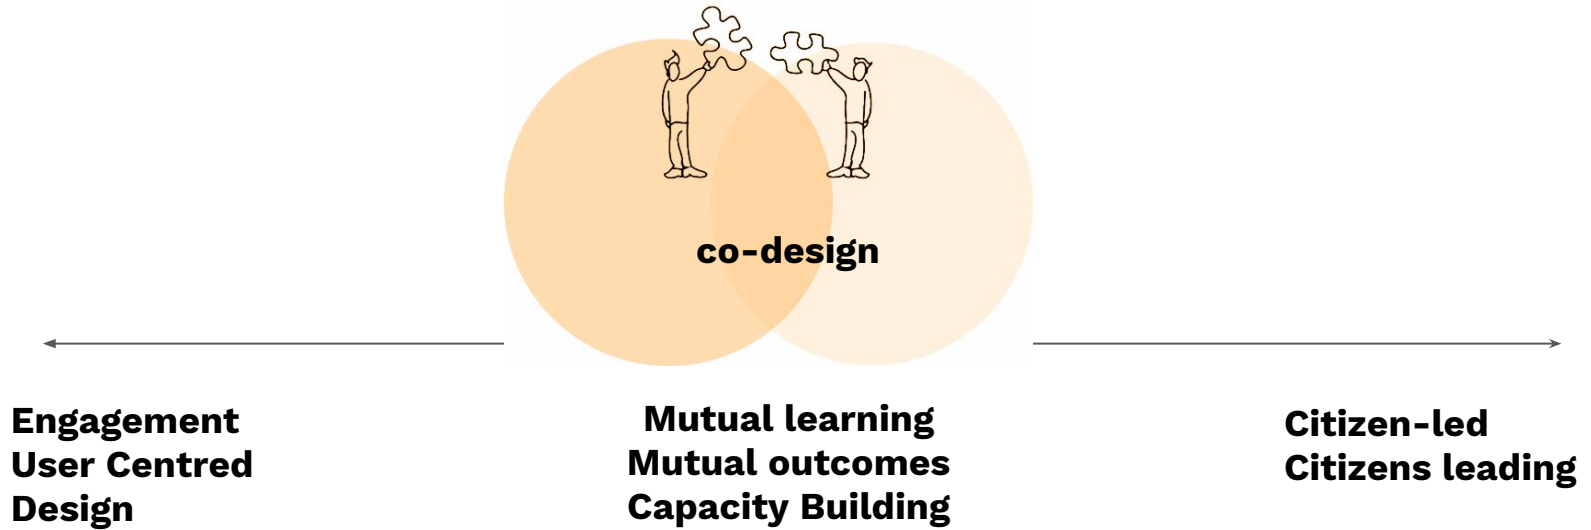

outcomes-seeker

Looking for the biggest opportunity
Pragmatic and strategic
Identifying energy and opportunity for change
Responsive to changing landscape
(not precious)

'Design-led' has a continuum

“Think like a system, act like an entrepreneur”
